

Onur Onel - Test Cases for Part 2

Case	Description	Input	Expected Output	Notes
01	Standard test for PersonStruct	name = "Alice", age = 30	Name: Alice, Age: 30	Direct assignment works as members are public.
02	Standard test for PersonClass	name = "Bob", age = 25	Name: Bob, Age: 25	Encapsulation ensures controlled access via getters.
03	Empty string for name	name = "", age = 20	Name: , Age: 20	Verifies handling of empty string input.
04	Negative age value	name = "Charlie", age = -5	Name: Charlie, Age: -5	Tests system behavior without input validation for age.
05	Test special characters in name	name = Élise, age = 28	Name: Élise, Age: 28	Verify special characters
